

NURSE PRACTITIONER  
BUSINESS OWNER

Are YOU an Nurse Practitioner with your OWN business?

Or are YOU an Nurse Practitioner with a dream of  
OWNING your own business?

**Then we want a moment of YOUR time!**

According to the 2010 Pearson Report, there are 158,000 Nurse Practitioners in the United States. What's missing however, are actual numbers of NPs in business.

Nurse Practitioner Business Owner (NPBO™), the leading online community for Nurse Practitioners, announces an opportunity for NPs to participate in the first ever survey to discover how many NPs are currently in or planning to be in business.

If you are a Nurse Practitioner with a clinical or non-clinical business, or if you are an NP who is thinking about starting a clinical or non-clinical business within the next 5 years, then we invite you to complete this **5 minute** survey that will provide our profession with state and national data never before captured.

Visit [www.NPBusinessSurvey.com](http://www.NPBusinessSurvey.com) to participate.

Whether you're exploring, starting or building your business, your input is invaluable.

**Thank You!**
